CAREER OBJECTIVE

Detail-oriented BS Information Technology student with 3+ years of freelance experience in data entry, web research, and data cleansing for retail, corporate, and medical clients. Skilled in SQL (MySQL, Microsoft SQL Server), spreadsheet data migration, and turning raw data into accurate, well-organized datasets. Oracle Java and SAP S/4HANA certified, looking for a Data Analyst role.

KEY SKILLS AND COMPETENCIES

Data Management and Research

- Data entry, data cleansing, and spreadsheet data migration
- Online research and organizing data into structured datasets

Software Development

- Java desktop applications using Java GUI (POS and reservation systems)
- Mobile app development and leading small development teams

Administrative and Organizational Skills

- Documentation and record management (e.g., digitizing medical invoices)
- Time management and meeting deadlines across retail, corporate, and medical clients

WORK EXPERIENCE

Freelance Data Entry & Research Specialist | Remote | 2022 – 2026

- Researched and compiled company information into accurate, structured datasets.
- Digitized and organized medical invoice records for easier access.
- Cleaned and migrated spreadsheet data across retail, corporate, and medical clients.

Point-of-Sale (POS) System – Project Lead | STI College Rosario

- Led the development of a POS system for a mini grocery store using Java GUI, recording product sales and transaction data.
- Delivered a working prototype with core sales and transaction features, showing how the store could replace manual record-keeping.

Restaurant Reservation System – Project Lead | STI College Rosario

- Led the development and delivery of a functional prototype of the main booking features, showing how reservations could be organized digitally.

EDUCATION

STI College – Rosario

Bachelor of Science in Information Technology

Expected Graduation: June 2027
